Dr. Kathy Swords from the J.R. Simplot Company discusses a new method of direct gene modification that uses only native DNA, taken from the crop itself. This revolutionary approach to crop biotechnology should enable improvements in crop value while increasing public acceptance.

**Science Community Lecture**
Modification of Agrobacterium Gene Transfer Methods to Avoid Insertion of Non-plant DNA Elements

**FRIDAY FEB. 17 3:30 - 4:30 PM**
Agricultural and Life Sciences (ALS) Bldg Rm. 4000

**THURSDAY FEB. 16 7-9PM**
at: LaSells Stewart Center
