GOLDEN RICE
Humanitarian Vision and Political Roadblocks
Dr. Ingo Potrykus

Science Community Lecture
Genetic Engineering of Pro-vitamin A Production in Rice
THURSDAY OCT. 13  4-5PM
Peavy Auditorium Rm. 130

“Golden Rice,” genetically engineered with Pro-vitamin A, may be capable of helping millions of impoverished children in the developing world. Dr. Ingo Potrykus shares the basic science of how it was created, how it has been received in Europe and the developing world, and the personal and political battles he has faced during its development.

WEDNESDAY OCT. 12
7-9PM
at: LaSells Stewart Center
